Art Unit: 3742

Claim Objections

1. Claims 1-43 are objected to because of the following informalities: "the predetermined **potion**" recited in claim 1, lines 30-31 has a typo error and should be changed to "the predetermined **position**" (also noted in claim 13, lines 37-38; in claim 29, lines 56-57; in claim 30, line 32; in claim 34, line 38; in claim 36, line 33; in claim 37, line 34; in claim 41, line 40; in claim 43, line 36). Correction is required.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 3. Claims 44-50 are rejected under 35 U.S.C. 102(b) as being anticipated by Rohrbaugh et al (US 5,770,838). Rohrbaugh discloses induction heater to improve transitions in continuous heating system (50), and method comprising a steel product (40), wherein the steel product is heat-treated product (col.3, lines 36-37). With regard to claims 44-50, the patentability of a product does not depend on its method of production. If the product in the product-by-process claim is the same as or obvious from a product of the prior art, the claim is unpatentable even though the prior product was made by a different process." In re Thorpe, 777 F.2d 695, 698, 227 USPQ 964, 966 (Fed. Cir. 1985). In this case, the term "the steel product is heat-treated by the heat treatment method according to claim...", recited in claims 44-50, is considered a

Art Unit: 3742

product-by-process claim. Therefore, the claim recites only a steel product and no patentable weight is given to the recited method of heat-treating the steel.

Page 3

- 4. Claims 44-50 are rejected under 35 U.S.C. 102(b) as being anticipated by Demidovitch et al (US 6,180,933). Demidovitch discloses a furnace for heating ferrous metal workpiece comprising a steel product (S1, S2), wherein the steel product is heat-treated product (col.8, lines 46-67). With regard to claims 44-50, the patentability of a product does not depend on its method of production. If the product in the product-by-process claim is the same as or obvious from a product of the prior art, the claim is unpatentable even though the prior product was made by a different process." In re Thorpe, 777 F.2d 695, 698, 227 USPQ 964, 966 (Fed. Cir. 1985). In this case, the term "the steel product is heat-treated by the heat treatment method according to claim...", recited in claims 44-50, is considered a product-by-process claim. Therefore, the claim recites only a steel product and no patentable weight is given to the recited method of heat-treating the steel.
- 5. Claims 1-43 are allowed if overcome the above objection.
- 6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure: Doizaki et al (US 6,285,015) discloses an induction heater with a unit for preventing generation of sparks. Kim et al (US 5,487,795) discloses a method for heat-treating an impact beam of automotive vehicle door. Travers et al (US 4,484,048) discloses a process and apparatus for inductive heating of flat, thin, conductive and non-magnetic flat products.
